What is “Single Stream” recycling?

Single Stream recycling means no more sorting out your recyclable items. All items on the recycle list are combined into one container and then sorted out later.

- Plastic
- Metals: Aluminum, Tin
- Cardboards
- Paper items: Newspaper, Magazines, Catalogs, Mail (junk), Telephone books/ paperback books (no hardbound books), Printer & copy paper, office paper, All other paper

DO NOT Recycle Non-recyclable such as:

- Glass of any type, mirrors, porcelain, cook ware, bottles, windows, light bulbs etc.
- HAZARDOUS materials: petroleum products, batteries, paints, pesticides, aerosol cans or containers of any of the above items
- BIO HAZARDOUS materials: Hypodermic Needles, Diapers, Blood Contaminated Items
- Electrical cords, Rope, Hose, Styrofoam, Food, Diapers, Needles, Plastic Hangers

How it works?

You recycle all your unwanted recyclables (aluminum, plastic, paper & several other items) as indicated into one of many conveniently located blue bins or brown rolling bins.

No more sorting, Florida Express Environmental “state-of-the-art” sorting plant does the rest.

What is not recycled, glass of any type, food waste and general garbage go into normal trash which is converted to energy.

Note: Please become familiar with the posted signs and abide by acceptable and not acceptable items signs.

Single Stream Recycling
